Subject: Wheel Bearing Kits Now Available

2011-04-CSB-AL

**Beck/Arnley is proud to announce that we now offer Wheel Bearing Kits!**

- Wheel bearing replacement is now easier because our wheel bearing kits include all the needed hardware.
- Our kits include the wheel bearing, which supports a vehicle's wheels and allows the wheels to spin freely, which contributes to the economy, safety, and quiet ride of you vehicle. A worn or defective wheel bearing will cause noisy, hot, unsafe conditions and can even affect fuel consumption and proper handling.
- Our wheel bearing kits come with all the high quality parts needed to replace the wheel bearing right the first time to save time and money. The bearing kits will cover the specific application and include all of the necessary components which could include grease, nut, circlip, seal, washer, gasket, split pin, collar, o-ring, and shims. The application will dictate which components come in the kit.
- Beck/Arnley carries only the highest quality and safest wheel bearing kits that fit your vehicle.
