

Beck/Arnley

Foreign Branded Brake Pads

Features

- Beck/Arnley now covers over **4,342** applications in this category.
- Sumitomo (SEI) was our first addition to this new product category. They were the first disc brake manufacturer in Japan.
- ATE, Mintex, Jurid, TRW, Pagid, and Textar are new brands recently added for European applications.
- Nissin and Advics are new brands added for Asian applications.
- Pads are in original packaging with a Beck/Arnley label.
- The category will be expanding to include other OE brands for Asian and European applications.
- This category is the 089 series. Please see catalog for complete listings.

Benefits

- These reliable brakes are suited for automotive applications due to the excellent heat dissipation and stable braking action.
- Specially developed for each application, these friction materials are an integral part of braking systems and are used widely throughout the automotive industry.
