

Beck/Arnley

Premium Ignition Wire Sets

Features & Benefits

- Mag Core Wire (SAE Type 4) for Asian Applications.
 - More alloy turns per inch
 - Protective Coating
- Copper Core Wire (SAE Type 1) for German Applications (5, 7 & 8 mm).
- Fiberglass braiding for extra strength and flexibility – Higher Class Rating.
- EPDM inner insulation prevents arcing and voltage leak.
- Beck/Arnley Wire Sets feature all stainless steel terminals. Terminals are positively crimped with extra pull strength for reliable connections, even after several spark plug changes.
- Beck/Arnley wire has silicone jackets for all applications.
- OE style configured boots seal at wire and spark plug to protect connection from heat, dirt, and moisture.

Perfect Fit Every Time!

- **Beck/Arnley Wire Sets are always the right length!** No stretching or excess to be coiled up or hidden away.
- Diameter meets OE specifications so wires stay put in looms and clips.
- Connectors match OE design and incorporate any needed resistors, clips, vents, or locks.
- All sets come complete with wire separators and dielectric grease packets where applicable.
