

Beck/Arnley New Water Pumps

Everything You Need

Beck/Arnley offers a full line of new water pumps for import applications.

Our water pumps come with all necessary gaskets and seals.

When Changing a Water Pump, Did You Know...

- ◆ We recommend replacing the fan clutch to prevent heating problems. Approximately 50% of engine problems are a result of cooling system failures that can be avoided with proper maintenance and replacement of critical components.
- ◆ It's a good time to check the timing belt and tensioner.
- ◆ The antifreeze should be changed.
