Beck/Arnley Enhances Web Ordering Capability for Canadian Customers

SMYRNA, Tenn., April 12, 2006 - Beck/Arnley announces its ordering Web site, www.beckorder.com, has been enhanced to provide Web ordering capabilities for Canadian customers.

With a valid identification name and password, users can easily sign in and place orders in Canadian dollars, which are then shipped from Beck/Arnley's Canadian warehouse. Canadian customers can also place orders after hours, just as their U.S. counterparts do. No further effort is required by the user; the new system will determine whether the customer is placing a Canadian or U.S. order based on the user identification.

"This enhancement is part of an ongoing list of changes we have in store for the Beck/Arnley ordering Web site," said Anne Coffin, Beck/Arnley's vice president/chief information officer (CIO). "Our intent is to make the ordering process as easy as possible for all of our customers. With that in mind, look for French and Spanish language versions in the near future."

Beck/Arnley is exclusively dedicated to supporting its distribution partners who service the foreign nameplate repair market. Founded in 1914, Beck/Arnley's broad product offering is organized into six modules: Brake & Chassis, Electrical, Clutch & Driveline, Engine Management, Engine Parts & Filtration, and Cooling Systems. Headquartered near Nashville, Tennessee, Beck/Arnley distributes parts to resellers through its MDC in Smyrna, Tennessee and six satellite customer care centers strategically located around the U.S. and Canada. www.beckarnley.com
