Beck/Arnley Now Offers Line of Water Flanges

SMYRNA, Tenn., Jan. 18, 2010 – Beck/Arnley is pleased to announce it now carries a line of water flanges for European vehicles, which includes 31 part numbers, covering more than 630 applications.

Manufactured to meet OE design configurations, Beck/Arnley's water flanges are made with the highest quality materials to withstand the harsh underhood environments found on many of today's roads.

"Beck/Arnley's water flanges come with all the necessary sealing o-rings right in the box," said Tom Fritsche, director of product management. "This is another example of our product enhancements and solutions that we add in the packaging to make the installation job easier and more efficient for professional technicians."

About Beck/Arnley:

Beck/Arnley is exclusively dedicated to supporting its distribution partners who service the foreign nameplate repair and maintenance market. Beck/Arnley supplies wholesale distributors, who sell to jobbers, and retailers. Founded in 1914, Beck/Arnley's broad product offering for the aftermarket is organized into six modules: Brake & Chassis, Electrical, Clutch & Driveline, Engine Management, Engine Parts & Filtration, and Cooling Systems. Headquartered near Nashville, Tenn., Beck/Arnley researches, sources and delivers parts to resellers through its Master Distribution Center in Smyrna, Tenn. and strategically located satellite distribution centers across North America. Additional information is available at www.beckarnley.com.
