Beck/Arnley Expands Line of Control Arms

SMYRNA, Tenn., July 7, 2010 – Beck/Arnley's brake and chassis product module has been recently expanded to include a total of 559 control arms to cover 6,823 import applications, according to Bob Anderson, vice president product management. Beck/Arnley's control arms are a direct OE replacement product that is designed to restore vehicle ride quality, as well as proper alignment and tire wear.

Beck/Arnley's control arms are made from premium materials and undergo stringent quality control and testing processes to ensure product excellence and reliability. New hardware and bushings are included, where applicable, to make the job easier for the technician.

"With Beck/Arnley, technicians can get all of the control arms that they need for all of their import applications from one source – and that's just one of the features that set Beck/Arnley apart from the competition," said Anderson. "All of our chassis products are available for import applications serviced by today's technicians, including model years 1961 to 2010. We provide the perfect fit every time."

Beck/Arnley is the original brand of premium, OE quality import parts from around the world for cars, light trucks and SUVs. Unlike others, Beck/Arnley sources one part at a time, from the OE supplier or approved manufacturers, to find the best part for a specific model and year.

Beck/Arnley is committed to being first to the aftermarket, and the company continually adds new numbers to its wide range of nearly 80 product categories. Beck/Arnley partners with wholesale distributors, who service jobbers and retailers, to supply the best OE replacement import parts for professional technicians for maintenance and repair services.

To find a distributor or store, or to place an order, call 1-888-464-2325.

About Beck/Arnley:

Beck/Arnley is exclusively dedicated to supporting its distribution partners who service the foreign nameplate repair and maintenance market. Beck/Arnley supplies wholesale distributors, who sell to jobbers, and retailers. Founded in 1914, Beck/Arnley's broad product offering for the aftermarket is organized into six modules: Brake & Chassis, Electrical, Clutch & Driveline, Engine Management, Engine Parts & Filtration, and Cooling Systems. Headquartered near Nashville, Tenn., Beck/Arnley researches, sources and delivers parts to resellers through its Master Distribution Center in Smyrna, Tenn. and strategically located satellite distribution centers across North America. Additional information is available at www.beckarnley.com.
