## **Beck/Arnley Adds Wheel Bearing Kits to Line of Genuine Foreign Nameplate Parts**

**Smyrna, Tenn., Aug. 11, 2011** – Wheel bearing replacement is now easier than ever because Beck/Arnley's new wheel bearing kits include all of the high quality parts that technicians need to replace the wheel bearing right the first time; saving both time and money.

"Wheel bearings are important components to the vehicle because they support the wheels and keep them spinning freely," said Paul Farwick, vice president sales for Beck/Arnley. "When you have a worn or defective wheel bearing, it can be noisy and create unsafe conditions, as well as affect the vehicle's fuel consumption and proper handling."

Beck/Arnley's new wheel bearing kits cover specific vehicle applications and include all of the necessary hardware to complete the repair job, such as grease, nut, circlip, seal, washer, gasket, split pin, collar, o-ring and shims. The application dictates which components come in the kit.

### **About Beck/Arnley:**

Beck/Arnley is exclusively dedicated to supporting its distribution partners who service the foreign nameplate repair and maintenance market. Beck/Arnley supplies wholesale distributors, who sell to jobbers, and retailers. Founded in 1914, Beck/Arnley's broad product offering for the aftermarket is organized into six modules: Brake & Chassis, Electrical, Clutch & Driveline, Engine Management, Engine Parts & Filtration, and Cooling Systems. Headquartered near Nashville, Tenn., Beck/Arnley researches, sources and delivers parts to resellers through its Master Distribution Center in Smyrna, Tenn. and strategically located satellite distribution centers across North America. Additional information is available at [www.beckarnley.com](http://www.beckarnley.com).
